**EDUCATIONAL OBJECTIVES**

- Review, describe the intricate anatomy of the uncinated process, and identify the relationship of nerve roots, the vertebral artery and foramen
- Review the techniques and perform under the guidance of experts, anterior and posterior surgical approaches to the cervical spine including posterior decompression techniques including laminotomy, foraminotomy, laminoplasty, laminectomy and facetectomy
- Fusion techniques including occipito-cervical constructs, C1-2 transarticular fixation, subaxial wire and plating constructs
- Anterior decompression techniques including discectomy, foraminotomy and corpectomy
- Anterior fusion techniques including Smith–Robinson and strut grafting as well as subaxial plate, odontoid fixation and cages
- Transoral approach to dens resection
- Discuss surgical indications and complications management for the above procedures

Due to federal regulations, participants are not allowed to place products into the cervical spine that are not FDA-approved.
